ABSTRACT

The objective of the study was to determine the causes of Non-Performing loans in small and medium enterprises. Non-Performing loans are widely associated with bank failure and financial crises for financial institutions as well as the macro economy of the country. The eradication of NPL's is a necessary condition to improve the economic status and stability of the banking and lending sector. If the Non-Performing loans are kept existing and continuously rolled over the resources are locked up in unprofitable sector; thus, hindering the economic growth and impairing the economic efficiency. The study adopted the Descriptive Design and applied both simple regression models on primary data to determine the relationship between causes of Non-Performing Loans in small and medium enterprises.

Non-performing loan was used as the dependent variable. The sample of this study comprised of 392 small and medium enterprises in Monaragala and data was analyzed using SPSS. Here, the researcher adopts Descriptive statistics, Correlation analysis and Regression analysis to test the research questions.

The study revealed that non-performing loans of small and medium enterprises are positively correlated with individual characteristics, business characteristics and loan characteristics respectively. The study concludes that the independent variables considered in the study jointly caused the non-performing loans in small and medium enterprises. The study also found that the non-performing loans were positively correlated with individual characteristics, business characteristics and loan characteristics. The objective of the study, which was to determine the causes of non-performing loans in small and medium enterprises, was therefore met. The study recommends that in order for the financial institutions to improve, there is a need for the significance affect factors should be introduced for the purpose of providing loans to the SMEs.

Key Words: Non-Performing loans (NPL)

CHAPTR FIVE	57
DATA PRESENTATION AND DATA ANALYSIS	57
5.1 Introduction	57
5.2 Overview of the Survey	57
5.3 Data Presentation and Analysis of Demographic Information	57
5.3.1 Type of the Business	58
5.3.2 Job Position of the Respondent	59
5.3.3 Gender	59
5.3.4 Age	60
5.3.5 Education	61
5.3.6 Annual Turnover of the Business	62
5.3.7 Number of Employees	62
5.3.8 Nature of the Business	63
5.4 Data Presentation and Analysis of Research Information	64
5.4.1 Reliability Test	64
5.4.2 Frequency Distribution Analysis	65
5.4.2.1 Frequency Distribution Analysis of IC, BC and LC	65
5.4.2.2 Frequencies for Non-Performing Loans	66
5.4.3 Descriptive Statistics	66
5.4.4 Correlation Analysis	67
5.4.4.1 The Relationship between Individual Characteristics and NPL's	67
5.4.4.2 The Relationship between Business Characteristics and NPL's	68
5.4.4.3 The Relationship between Loan Characteristics and NPL's	69
5.4.5 Testing Hypotheses	69
5.4.6 Simple Regression Analysis	70
5.4.6.1 Simple Linear Regression Analysis for Individual Characteristics for Non-Performing Loans in Monaragala District.	70
5.4.6.2 Simple Linear Regression Analysis for Business Characteristics for Non-Performing Loans in Monaragala District.	71
5.4.6.3 Simple Linear Regression Analysis for Loan Characteristics for Non-Performing Loans in Monaragala District.	73
