ABSTRACT

Sri Lanka's electricity consumption rate significantly enhanced while comparing to the last two decades. The expansion of rural electricity distribution projects and the rapid increase in households and firms' electricity usage, the increase in the purchasing level of electrical instruments are the significant reasons for this situation. Even though the electricity consumption level is increased, the generation of electricity power is limited due to the lack of availability of the power resources. Therefore some unavoidable situations are supposed to occur while trying to control the consumption of electricity. Though some actions are taken by Ceylon Electricity Board to control the power consumption, the public has the responsibility to use the electricity power efficiently. This study is entitled "Factors influencing on electricity consumption pattern and energy saving behaviour in Batticaloa district (Special reference in Manmunai North Division). And especially this study is conducted in 4 Grama Niladhari divisions in Manmunai North.

This study will provide clear understanding and knowledge of the factors which influence the electricity consumption pattern and energy saving behaviour. The determinants of the electricity consumption pattern and energy saving behaviour are identified and analyzed in this study. Further 200 questionnaires were issued to the selected electricity consumers in Puliyanthivu (West), Puliyanthivu (East), Puliyanthivu (Central) and Puliyanthivu (South). The collected data are presented through the frequency table and analyzed through ANOVA, T - Test and bivariate measures which are correlation and regression.

Researcher hypothesized and found that among socio demographic variables, except gender the other demographic factors revealed that there is no difference among them on electricity consumption pattern and energy saving behaviour. The study also revealed that Environmental factors and psychological factors have positive relationship with electricity consumption pattern and ESB. Moreover, Environmental factors and Psychological factors have high impact on Electricity consumption pattern and ESB. Further, the findings of this study offer guidance to households looking to be using electricity efficient manner in their houses.

Keywords: Socio Demographic Factors, Environmental Factors, Psychological Factors, Electricity Consumption Pattern and Energy Saving Behaviour.

5.4 Chapter Summary	69
CHAPTER-6: DISCUSSION ON FINDINGS	70 - 80
6.1 Introduction	70
6.2 Respondents Profile	70
6.2.1 Gender of Respondents	70
6.2.2 Age Group of Respondents	71
6.2.3 Occupation of Respondents	71
6.2.4 Income Level of Respondents	71
6.2.5 Education Level of Respondents	71
6.2.6 Family Size of Respondents	72
6.2.7 Nature of Family of Respondents	72
6.2.8 Civil Status of Respondents	72
6.2.9 Electricity Consumption by Activity	72
6.2.9.1 Electricity Consumption by Studying Activity	72
6.2.9.2 Electricity Consumption by Entertainment Activity	72
6.2.9.3 Electricity Consumption by Routine Activity	73
6.2.9.4 Electricity Consumption by A/C, Fan	73
6.2.9.5 Electricity Consumption by Gardening Activity	73
6.2.9.6 Electricity Consumption by House Lighting Activity	73
6.2.10 Dwelling Type	74

6.3 The Research Information	74
6.3.1 Discussion – Objective one	74
6.3.1.1 Difference between Gender	74
6.3.1.2 Difference between Age	75
6.3.1.3 Difference between Occupation	75
6.3.1.4 Difference between Income	75
6.3.1.5 Difference between Education	75
6.3.1.6 Difference between Family size	76
6.3.1.7 Difference between Nature of Family	76
6.3.1.8 Difference between Civil Status	76
6.3.1.9 Difference between Dwelling Type	76
6.3.2 Discussion - Objective Two	76
6.3.3 Discussion – Objective Three	77
6.3.4 Discussion – Objective Four	78
6.3.5 Discussion – Objective Five	. 78
6.4 Hypothesis Testing	79
6.5 Chapter Summary	80
CHAPTER-7: CONCLUSIONS AND RECOMMENDATIONS	81 - 86
7.1 Introduction	81
7.2 Conclusion	81
7.2.1 Objective One	81
7.2.2 Objective Two	82
7.2.3 Objective Three	82
7.2.4 Objective Four	82
7.2.5 Objective Five	83
7.3 Contributions of the Study	83
7.4 Recommendations of the Study	84
7.5 Limitations of the Study	85
7.6 Direction for Future Research	86
