ABSTRACT

Daily wage earners are the people who gain a lower of income in the society and remain backward a lot in the society. In order to identify their socio economic status of them I have selected the Town and Gravets divisional secretariat division of Trincomalee as the research area. This survey is made based on the information about social factors and economic factors. In order to make the research study easier I have divided it in to six chapters. Chapter one is the introduction of the research study. Chapter two is literature review, which explain the theoretical aspect of the research study. Chapter three explains conceptualization and research methodology. The presentation of collected data is included in chapter four and chapter five explains details about the collected data. Finally I have explained the conclusion and recommendation of the research study in the chapter six.
