SUMMARY

Kattankudy Divisional Secretariat is a developed division in the Batticaloa Districts, which was studied by me, forward developing 2000 years, in area of Agriculture, Education, Health, Fisheries, Small industry, Self employment, Co-operative, Rehabilitation and Reconstruction and housing welfare facilities.

Agriculture is concerned in this area covered as a homegarden basis in smallportion. While education is very power compared with other divisional area.

Fisheries is very important sector to develop which was affected by not when small industry and self employment is developed, their main income source is business.

Kattankudy is a high density population area since land is very less, therefore people are trying to build up multi building, and Rehabilitation and reconstruction must be needed there because most of area was damaged.

Cooperative sector also should be developed even it provides proper service to the public.

Therefore, I have recommended some strategies in order to improve quality life of the people after analysing strength, wekness, opportunities and threats of the above sectors.
