THE ABSTRACT

This study measuring the effectiveness of the past activities of that the institutions which had played in rehabilitation and reconstruction programmes in Batticaloa district which affected by the severe internal war by this most of the rural people have been dropped their normal lives and demolish physical properties as a result they displaced as refugees. Those people are now resettled with the programmes imposing by the Governmental & Non- Governmental organizations.

The samples were taken with special reference to pattiruppu electorate division in which 100 samples were taken for this study by using cluster sampling method.

As research finding reveals unsatisfaction results from this survey. Maury reasons were given by people with regard to the unsatisfaction of these rehabilitation and reconstruction programmes. As far as social infrastructure is concerned, houses constructed were found to be unsatisfactory and in completed. Further financial assistance also was found to be not enough. As far as agriculture infrastructure facilities are concerned, Irrigation and agro- training ware not provide every one. In addition the amount of credit and subsidies ware said to be very less, according to them. As far as economic infrastructure is concerned, self employment training, credits provided were found to be less and compensation provided to self employees also is said to be less. Due to these reasons people are found be unsatisfied.

The recommendations were given to increase the effectiveness of rehabilitation and reconstruction programmes.
