ABSTRACT.

There are many natural disasters, which have affected our country. Like earth quack, cyclone etc. but the recent Tsunami victim is probably the greatest natural disaster to strike Srilanka in recorded history. It was sudden & unexpected & was over rather quickly, but its aftermath & repercussion will never berate for years to come. In Srilanka the disaster, this has mainly affected in the areas of Fishing industry, Tourism & Agriculture sector.

The research aim is to find the impact of Tsunami on fishing industry in Mammunai South Eruvil Pattu Divisional Secretariat Division. Because of that the fishing industry of our country had to be severely affected. In under to do this research, five variables which have taken which are Economical factors, Social factors, Psychological, Environmental factors & Attitudes factors. About 731 fishermen who have been affected by the disaster & 100 sample fishermen selected for sample & questionnaire have been given to those fishermen then the collected have been presented using Univariate analysis.

The research consists of five chapters, which are Introduction, Literature review, Data analysis & presentation, Discussion & conclusion & Recommendation.

Chapter 01 includes the overview (Introduction), Background of research area, problem identification, Objective of the research, Significance, Methodology, Conceptualization for the research, Assumption & Limitation.

Chapter Two deals with introduction to disaster & natural disaster, classification of it Tsunami disaster, characteristic of its Economic impact, Psychological impact, Environment impact of it on fishermen.

Chapter Three deal with collected data. Two type of data, Personal & research information related with the impact on fishermen.

In the fourth chapter evaluated data by used univariate analysis discussed, that the data are personal & research information. Final & fifth chapter is the Recommendation & Conclusion part. It deals with certain recommendation & suggestion to rebuild up the fishing industry had to severally affected in my research area.
