Abstract

In this research study measure the Impact of Tsunami on Fishing Industry. The research aims is find out how far the fishermen affected by the Tsunami. For this research five factors are to be taken such as, Economic, Social, Psychological, Environmental and attitude of the fishermen. There are 509 fishermen are in the Karaitiva D.S Division. Out of this 150 have been selected for sample and questionnaire have been given to those fishermen. Collected data have been analyzed using SPSS package with the Mean and Standard Deviation. It has consisted of five chapters that are Introduction, Literature review, data Analysis and Presentation, Discussion and finally Conclusion and Recommendation.

In the first chapter it has consider the Introduction, Problem of Research, Objective of Research, Conceptualization that is related to the Research, Method to use to collect and Evaluate the data, Limitation and Assumption.

Second chapter consists about Natural Disaster, Types of Natural Disaster, About the Tsunami, Tsunami Disaster and Sect oriel Impact and Impact of Tsunami Disaster on the Fishing Industry. In the third chapter Collected Information Presented and were analyze. It consist have the personal information and information regarding the impact on Fishing Industry. All the evaluation of the data were discussed in the fourth chapter that the Personal and Research information.

This research study has come to the conclusion that the Impact on the Fishing Industry. I would also like to suggest some Recommendation and Implication to achieve the Research Objective. This is the final chapter.

Chapter -01

Introduction

1.1 Overview	1-10
1.2 Introduction of the research area	3-4
1.3 Significant of the study	4
1.4 Problem of research	5
1.5 Objectives of research	6
1.6 Research methodology	6
1.6.1 Sample size	6-7
1.6.2 Data collection method	7
1.6.3 Evaluation method	7
1.7 Assumption of the study	8
1.8 Limitation of the study	8
1.9 Conceptualization of the study	8
1.10 Definitions for impact	9-10

Chapter -02

Literature Review

2.1 Introduction	11-37
2.2 Common natural disasters	11
2.3 Extreme natural disasters	11
2.4 Types of extreme natural disasters	12-16
2.5 Type of common natural disasters	16-17
2.5 Tsunami disaster	17
2.6.1 Characteristics of tsunami	18-19
2.6.2 Causes for tsunami	19
2.6.3 Tsunami in south Asia	20
2.6.4 Over impact of the tsunami in srilanka	20
2.6.5 Affected areas by tsunami in srilanka	21
2.7 Environmental impact of the tsunami disaster in srilanka	21-22
2.8 Damage overview	22-23
2.8.1 Damage to the coast line	22
2.8.2 Impacts on protected areas in the coastal zone	23
2.8.3 Impacts on coral reef and the marine ecosystem	23-24
2.8.4 Debris disposal	24
2.8.5 Surface and ground water contamination	24
2.9.0 Social impact of the tsunami in srilanka	25
2.9.1 Damage overview	25

2.9.1 Damage overview	25
2.9.2 The north east	25-26
2.9.3 Orphans	26
2.9.4 Single-headed house holds	26
2.9.5 Shelter	27
2.9.6 Legal aspects	28
2.9.7 Involuntary resettlements	28
2.10 Economic impact of the tsunami in srilanka	28-29
2.10.1 Overview	29-30
2.10.2 Assets losses	30
2.10.3 Output losses	31
2.10.4 Fishing	32
2.10.5 Tourism	32
2.10.6 Construction	32-33
2.10.7 Inflation	33
2.10.8 Balance of payments	33
2.10.9 Fiscal impact	33
2.11 Psychological impact of the tsunami in srilanka	34
2.12 Fishermen impact of the tsunami in srilanka	34-35
2.13.1 Damage overview	35-37
2.14 Summary	37

Chapter -03

Data Presentation and Analysis

3.1 Personal importations	38-57
3.1.1 Size of fishermen family	38
3.1.2 Age distribution of fishermen family	39
3.1.3 Monthly income of fishermen	40
3.1.4 Nature of fishermen	41
3.1.5 Nature of residential damages	42
3.1.6 Value of residential damages	43
3.1.7 Value of professional building damages	44
3.1.8 Nature of professional instruments damages	45
3.1.9 Damages value of professional instruments	45-46
3.1.10 Nature of professional centre damages	46-47
3.1.11 Nature of other property damages	47
3.1.12 Damages value of other property damages	47-48
3.2.0 Research information	48
3.2.1 Economic impacts	48-50
3.2.3 Psychological impacts	52-57
3.2.4 Environmental impacts	53-55
3.2.5 Fishermen attitude	55-57

Chapter -04**Discussions**

4.1 Introduction	58-69
4.1.1 Discussions on personal informations	58
4.1.2 Size of fishermen family	58
4.1.3 Age distribution of fishermen family	58
4.1.4 Income level of fishermen	59
4.1.5 Educational level of fishermen	59-60
4.1.6 Nature of fishermen	60
4.1.7 Nature of residential property damages	60-61
4.1.8 Professional property damages of fishermen	61
4.1.9 The nature of professional instruments damages	61
4.2 The nature drying/preservation centre	61
4.2.1 The nature of other property loss	62
4.3 Discussions on research based informations	62
4.3.1 Economical impacts on fishery	62-63
4.3.2 Social impacts on fishery	63-63
4.3.3 Psychological impacts on fishery	64-66
4.3.4 Impact on attitude impacts on fishery	65-66
4.3.5 Environmental impacts	
4.4 Compares on fishermen age and attitude	67
4.4.1 Compares on economical factor and monthly income	67
4.4.2 Compares on psychological and age of fishermen	67-68
4.4.3 Compares on society and education of fishermen	68
4.5 Summary	69

CHAPTER -05**Conclusion, recommendation and implication**

5.1 Conclusions	70-71
5.2 Recommendations	72-73
5.3 Implications of research	74
