It has consisted of five chapters that are Introduction, Literature review, data Analysis and Presentation, Discussion and finally Conclusion and Recommendation.

In the first chapter it has consider the Introduction, Problem of Research, Objective of Research, Conceptualization that is related to the Research, Method to use to collect and Evaluate the data, Limitation and Assumption.

Second chapter consists about Natural Disaster, Types of Natural Disaster, About the Tsunami, Tsunami Disaster and Sectoral Impact and Impact of Tsunami Disaster on the Fishing Industry. In the third chapter Collected Information Presented and were analyze. It consist have the personal information and information regarding the impact on Fishing Industry. All the evaluation of the data were discussed in the fourth chapter that the Personal and Research information.

This research study has come to the conclusion that the Impact on the Fishing Industry, I would also like to suggest some Recommendation and Implication to achieve the Research Objective. This is the final chapter.
