ABSTRACT

On boxing day, 26th December 2004, coastal areas of the countries around the Indian ocean, including Sri Lanka were hit by a tsunami, caused by an earth quack off the coast of the Indonesian island of Sumatra. It killed over 300,000 people in Asia and Africa, about 40,000 in Sri Lanka alone. It destroyed home and buildings, road, railways and other infrastructure facilities. This unprecedented disaster made numerous impacts on economic sector of Ampara district. According to the government over 10,000 people were killed there and more than ten times that number made homeless. Kalmunai Tamil D.S Division was also severely affected in Ampara District due to the tsunami.

So that I have to start research study that "Rehabilitation and Reconstruction programmes after the tsunami disaster in Kalmunai Tamil D.S.Division". The main objectives of this research is that to find out the affected people details and what type of affected, to find out necessary factors to improve the socio economic conditions of this division as well as physical and psychological condition of affected people, identify the way to create facilities and respect of the affected people through participation of government and non government organizations and finally to find out the way to rehabilitate and reconstruction of this division from affected. In this way this research study also help to other affected division through rehabilitation and reconstruction programmes.

The research data is collected through the two major ways such as method of primary data and secondary data collection. Two hundred questionnaires gave to the people due to the population size of the village in this division. This research study also used SPSS – Statistical Package For Social Science and EXCEL to find out the problems of this people through the data presentation and data analysis.

Today Government and Non Government Organizations are involving rehabilitations and reconstructions programmes in this division. However due to the data presentation and analysis and data collection we can identify that much rehabilitations and reconstructions programmes must be done to recover and rebuild of this division. Therefore this research report imposes some secretary recommendations to help the rehabilitations and reconstructions programmes in this division.

Contents

CHAPTER-01	Pages
1.0 Introduction	01-19
1.0.1 Resources	03-04
1.0.2 Population	04-07
1.0.3 Employees completion	08
1.0.4 Education	09
1.0.5 Health	09-10
1.0.6 Housing facility	10-11
1.0.7 Transport	12
1.0.8 Telecommunication	12
1.0.9 Roads	13
1.0.10 Economical position	13-16
1.0.11 Banks, financials and insurance organizations	17
1.0.12 Religious organization	17-18
1.1 Problem statement	19
1.2 Objective of the research	19
1.2.1 Sub objective of the research	20
1.3 Limitations	20
CHAPTER-02	
2.0 Economic impact of the tsunami in Sri Lanka	21-25
2.1 Scrotal by economic impacts	25
2.1.1 Fisheries	25-26
2.1.2 Tourism	26
2.1.3 Agriculture and livestock	27
2.1.4 Lively hoods	27-28
2.1.5 Health	28
2.1.6 Education	28

2.1.7 Housing	29
2.1.8 Transportation	29-30
2.1.9 Power	30-31
2.1.10 Water supply and sanitations	31
2.1.11 Telecommunication	31
2.1.12 Ports	32
2.1.13 Industries	32
2.1.14 Wildlife	32
2.2 Regional development	32-63
2.2.1 The concept of the regional development	32-35
2.2.2 Definition of the regional development	35-38
2.2.3 Indicators of the regional development	38-41
2.2.4 Three key principles of the regional development	42-43
2.2.5 Sustainable development and regional development	43-44
2.2.6 Regional development strategies	44-46
2.2.7 Some countries experience of the regional development strategies	46-47
2.2.8 Existing regional development strategies in Sri Lanka	48-53
2.2.9 Regional development programmes	53-54
2.2.10 Implications for closing the gaps	54-55
2.2.11 Objective of regional development	55-56
2.2.12 Significance of the regional development	57-60
2.2.13 Need for the regional development	60-63
CHAPTER-03	
3.1 Introduction	64
3.2 Conceptualization	64-69
3.2.1 Rehabilitation and reconstruction	65

3.2.2 Infrastructures development	65
3.2.3 Fisheries sector	65-66
3.2.4 Agriculture sector	66
3.2.5 Quality of life	66-67
3.2.6 Basic needs	67
3.2.7 Education	67-68
3.2.8 Health	68
3.2.9 Self-employment	68-69
3.3 Method of data collection	69-70
3.2.1 Primary data collection	69
3.2.2 Secondary data collection	70
3.4 Shambling process	70
3.5 Method of data presentation	71
3.6 Assumptions	71

CHAPTER-04

4.0 Introduction of Data Presentation	72
4.1 Personal Information	73
4.1.1 No of Family Members	73
4.1.2 Age Distribution	74
4.1.3 Education Distribution	75
4.1.4 Monthly Income Distribution	76
4.1.5 Nature of The Employment	77
4.1.6 Nature of The House Before The Tsunami	78
4.2 Research Information	79
4.2.1 Nature of The Human Losses After The Tsunami	79
4.2.2 Nature of The Psychological Affect	80
4.2.3 Nature of the Tsunami Awareness seminars	81
4.2.4 Nature of The Child Education After The Tsunami	82
4.2.5 Nature of The Income After The Tsunami	83

4.3.16 Nature of The Employment After The Tsunami	116
4.3.17 Losses of Employment Related Properties	117 - 118
4.3.18 Nature of Employment Restart After The Tsunami	118
4.3.19 Nature of The Properties Losses	118 – 119
4.3.20 Nature Living Place After The Tsunami	119
4.3.21 House located Bellow The 100 Meter	119
4.3.22 Land Beyond 100 Meter	119
4.3.23 Nature of Preference To Live In Their Own Place	120
4.3.24 Nature of The Infrastructure Facilities After The Tsunami	120 – 122
4.3.25 Nature of The Infrastructure Rebuild After The Tsunami	122
4.3.26 Nature of The Basic Needs After The Tsunami	122
4.3.27 The Non Government Organization's Relief Activities	123
4.3.28 Nature of The Non Government's Relief Activities	123
4.3.29 Nature of Livestock Losses	123
4.3.30 Nature of Vehicles Losses	123

CHAPTER-05

5.0 Introductions	124
5.1 Conclusion	124
5.2 Implementation	125-127
5.3 Recommendation	127- 144
5.3.1 Fishing sector	128-131
5.3.2 Agriculture	132-135
5.3.3 Self-employment	135-136
5.3.4 Education	136- 138
5.3.5 Health	138 – 140
5.3.6 Regarding the people who lost houses.	140 – 141
5.3.7 Infrastructure Facilities	141
5.3.8 Improve the quality of life	142

5.3.9 Psychological factors	142- 143
5.3.10 Regarding disaster of business	143
5.3.11 Basic needs	144
5.3.12 Lost of livestock and vehicles	144
