ABSTRACT.

Education is very important to individual society and nation. Every country must establish a good education system. In this country there is an argent need for a professional association. Education is one of the key priorities of the state in Sri Lanka Education today is a major concern involving student to follow various types of tertiary education courses

The Education in this research area is law and law level. There are lack of school building, lack of transport facilities, lack of teacher and lack of communication facilities.

The objectives of this research study was to identify the problems faced by this division in educational sector and to identify the causes of theses problem and preparing actions plan for the development of educational in this area.

This research investigation is based on the conceptualization. That is here infrastructure, administration, staffing, dropout and awareness. 100 families were taken as sample for the research. The structured questionnaires with the simple random sampling method were used to collected primary and secondary data were collected D.S office statistical reports. The collected data were analyzed using the univariate method with the help of SPSS computer package.

The findings shows, the development of educational sector in the Porathvu Pattu (Vellavelle) Divisional Secretariat Division related all variables such as infrastructure, administration, staffing, dropout and awareness expressed lower level of satisfaction.

In this area infrastructure facilities were dissatisfy (80%). It has taken mean value 1.97. And administration were dissatisfy level (99%), It has taken mean value 1.54, staff were dissatisfy level (48%) and it has taken mean value 2.36, Dropout were dissatisfy level (78%) and it has taken mean value 2.15 and making awareness were dissatisfy (46%) level and it has taken mean value 2.4. the aggregate of 100 sample with five dimension shows the final result of the development of educational sector were 79% of low level, 21% of were moderate level of contribution of educational development. The overall analysis concludes that the education development was lower satisfied.

This research study has come to the conclusion about development for educational sector. I would also like to suggest some recommendation (action plan) to achieve the research objective this is the final chapter. The action plan had five main objective and strategies. Objectives are increasing family support, providing learning environment, Increase student's commitment and involvement, providing basic needs and Develop teaching methods. Strategies of objectives are providing financial support, Increasing parent support, Increasing school physical facilities, Increasing utilities facilities, Develop school administration, providing extra learning facilities, Develop self-discipline, Increase learning involvement, Increase extra learning, providing basic facilities, Encourage social and culture factor, Develop teaching techniques, Develop teacher knowledge and skill, Increase teacher and students relation ship. If these objective and strategies are implemented by properly that will help to increase educate people and through this improvement we can educate people.
