## ABSTRACT

This study leads to identify the contribution factor for the development of Palmyrah based industries in Trincomalee District. The problems such as Low yield, over aging of Palmyrah & excessive use of the Palmyrah for consumption & Exports were identified.

All the contributing factors were analyzed through the questionnaires and direct observation of the industries which are in the field of development of palmyrah. 100 samples were taken out from the palmyrah producers.

At the end of the research solutions for the problems of marketing finance training & technology of the Development of Palmyrah industries were found and are given

Palmyrah Development Board & The government must concentrate on the development & growth of palmyrah by providing adequate facilities & also take necessary steps to develop palmyrah industries & to conserve the resource. Proper knowledge about cultivation of palmyrah & new technologies must be taught to the cultivators. Advices must be offered frequently. Availability of financial sources must be made ease to the cultivators.
