## ABSTRACT

This study leads to identify the causes for migration and resources problems in the Urban Council of Trincomalee District.

I made a research as "a study of causes of migration and the problems in resources faced with special reference to the Urban Council limits of Trincomalee District" to analysis this problems.

The main problems of this research is people have been migrated to the Urban Council area for the reasons of lack of resources problems in the villages and the imbalance in the life style in the village life. And also the other problems is this migration created the resources in the Urban Council area, that is water problem, housing problem, school admission problem, electricity problem and other important problems.

In order to find the problems, I used the sampling method to collect the data from the population of the Urban Council. I used the random sampling method, because the population is very large. I issued the 100 questionnaires to the selected Grama seva areas with respect of population proportion.

According to my research, I identified there are lot of people have migrated to Urban area between the last ten to fifteen years to get the facilities.

According to my findings, I have given some recommendations through my knowledge to solve the all resources problems in the city and how regulate the migration problems in the city.

I hope that this study will help and provide all the necessary information those who in the field of population management as well as resources problems and migration analysers wish to make the further research especially in Trincomalee District.
