

Study on the Effective Micro – Organisms [EM] on the yield of
Cow-pea (*Vigna unguiculata*)

By

R.A. Jayamaha

A RESEARCH REPORT

Submitted in Partial fulfillment of the Requirement of the
Advanced Course in Bio Technology

for

THE DEGREE OF BACHELOR OF SCIENCE IN AGRICULTURE

2002

Department of Study : Agricultural Biology

Majoring Module : Biotechnology in Agriculture

FACULTY OF AGRICULTURE

Eastern University, Sri Lanka

-Approved by-

47185

Mr. Ananda Tennakoon

(Supervisor)

Dr. Ananda Tennakoon
Senior Soil Scientist
Soil & Plant Nutrition Division
Coconut Research Institute,
Lunuwila, Sri Lanka.

Date: 01-07-2002

S. Raveendranath

(Co-Supervisor)

Dr. S. Raveendranath
Dean/Agriculture
Eastern University
Sri Lanka.

Date: 10/7/2002

T. Mahendran

Dr. (Mrs.) T. Mahendran
Head / Agronomy
Department of Agronomy
Eastern University
Sri Lanka.

Date: 10/07/2002

Dr. (Mrs) T. Mahendran
HEAD

Dept. of Agronomy
Faculty of Agriculture
Eastern University

List of Tables	iv
List of Figures	v
List of Plates	vi
1. Chapter One	
1 Abstract	1
2. Chapter Two	
2.1 Introduction	4
2.2 Objectives	5
3. Chapter Three	
Literature Review	6
3.1 Introduction	6
3.1.2 The concepts and philosophy of EM technology	7
3.1.3 Special activities of EM	8
3.1.4 Important Microorganisms in EM and their action in soil	9
3.1.4.1. Photosynthetic bacteria	9
3.1.4.2. Lactic acid bacteria	10
3.1.4.3. Yeasts	10
3.1.4.4. Actinomycetes	11

3.1.4.5.	Fermenting Fungi	11
3.1.5.	Application of Effective Microorganisms	12
3.1.5.1.	EM1 Stock Solution	12
3.1.5.2	EM fermented organic matters	12
3.1.5.3.	EM5 Solution	13
3.1.5.4.	EM fermented plant extract	13
3.2	Physical growth habit of Cow pea <i>(Vigna unguiculata)</i> Bush type	13
3.3	Assimilation of Nitrogen	14
3.4	Nodule forming and nitrogen fixation	15
4.	Chapter Four	
	Materials and Methods	17
4.1	Location and site description	17
4.2	Soil type	17
4.3	Experimental design	17
4.4	Treatments	19
4.5	Preparation of the experimental Plots	21
4.6	Preparation of EM green leaves compost	23
4.6.1.	Materials and Method	23
4.6.2.	T ₂ and T ₄ Treatment application	24
4.6.3.	T ₁ Treatment application	25
4.6.4.	T ₃ Treatment application	26
4.6.5.	EM foliar application	26

4.7.	Preparation of planting materials	27
4.8.	Sampling procedure	28
4.8.1.	Soil	28
4.8.2.	Plant	29
4.8.3.	Yield	30
4.9.	Soil sample preparation	30
4.10.	Soil Analysis	31
4.10.1.	Moisture	31
4.10.2.	pH (1.5 water)	32
4.10.3.	Electrical conductivity	32
4.10.4.	Organic carbon	33
4.10.5.	Cat-ion Exchange Capacity [C.E.C.]	35
4.10.6.	Total nitrogen	37
4.10.7.	Available nitrogen [NH_4^+ -N and NO_3^- -N]	37
4.11.	Plant Physical parameters	39
4.11.1.	Average plant height	39
4.11.2.	Number of root nodules	40
4.11.3.	Average leaf area	41
4.11.4.	Number of leaves	41
4.11.5.	Above ground and below ground Bio – Mass (Wet and Dry base)	41
4.12.	Statistical analysis of data	42

5.	Chapter Five	
	Results and Discussion	44
5.1	Soil parameters	44
	5.1.1. pH (1:5 water)	44
	5.1.2. Electrical conductivity	45
	5.1.3. Organic carbon	46
	5.1.4. Total Nitrogen	47
	5.1.5. Cat-ion Exchange Capacity [C.E.C.]	48
	5.1.6. Ammonium nitrogen (NH_4^+ - N)	50
	5.1.7. Nitrate nitrogen (NO_3^- - N)	51
5.2	Plant growth parameters	53
	5.2.1. Plant height	53
	5.2.2. Number of root nodules	54
	5.2.3. Leaf area	55
	5.2.4. Number of leaves	56
	5.2.5. Above ground Bio – Mass	56
5.3	Pod Yield (Total)	57
6.	Chapter Six	
	Conclusion	60
	Reference	61
