ABSTRACT

This study attempts to analyze the impact of microcredit programs on performance of microenterprise. The study is also meant to obtain insights regarding factors of performance of microenterprise. Enterprises performance was evaluate in five dimensions of Savings, Income, Employments, Repayment ability and Growth of Assets.

A total of 100 questionnaires were issued to selected Microenterprises in Kandy District. The study use of descriptive statistics such as frequencies, means, and standard deviation to measure the impact of micro credit programs on performance of microenterprises.

The results of the study indicate that there is a highly positive impact of all the indicators of performance of microenterprises after joining in microcredit programs. According to findings of this research the overall performance has been positively increased. This study makes the valuable contribution by providing a base to the microfinance institutions for strengthening and expanding their support to microenterprises.
