SUMMARY

Micro Credit is a Credit Programme. The objective of this credit is to enhance the standard of living, by providing Self-Employment opportunities to the people under the poverty line. But in case of CARE, It is not achieved the expected performance in Manmunai North D.S. Division. Therefore I intended to do a research study on **“Evaluation of the performance of CARE International in Micro Credit Programme of Manmunai North D.S. Division”** and also this research study aim to find ways to improve the standard of living of the beneficiaries.

The first chapter consist of the introduction of the research study, It disclose that what is the research problem, what are the assumptions made, what are the limitations, which methodologies are used to collect data and which evaluation method is used to analyze those data . The research evaluations the performance based on four Variables. They are, Self-Employment, Health, Education. Income and Savings. To analyze these Variables in the research, univariate and bivariate analysis has been used.

Second Chapter is literature review. It deals mainly the theories about credits and Self-Employment generation and standard of living.

Third chapter represents Data Analysis, Presentation and Evaluation. Basically pie charts and Bar Charts are used to present analyzed data.

Forth Chapter is Discussion. The Chapter explores the justification of research finding.

The Last Chapter deals with conclusion recommendation and implication.
