

ABSTRACT

The title "Effectiveness of Rehabilitation and Reconstruction Works made by the Government and Non-Government Organization under the administration of Vavuniya Divisional secretariat" has been intended by me as a research study.

In the world there are wars for many reasons thus in Sri Lanka it is due to ethnic conflict, this war take place more than two decades. Therefore North-East Province people experience untold suffering, being lost their properties, their lives and being displaced.

Therefore there are making many Rehabilitation and Reconstruction work by Government and NGOs to resettle the people affected by war in their own places. Aim of my research is to analysis whether development programs have brought development in living stand of this region people

Chapter-1 consists of the introduction of the research study; it discloses that ,what is the research problem, research objectives, what are assumptions, what are limitations.

The second chapter describes the definition of rehabilitation and other related theories. Third chapter which is expresses that which methodologies are used to collect the data and which evaluation method is used to analysis those data and the conceptualization.

Forth chapter represents the collected data and fifth chapter is concerned with data analysis.

Finally the fifth chapter deals with the conclusions and recommendations from survey
