## Abstract

Geographical location of Batticaloa district leads most people to fishing as their major income resource, Because most of the land part of our district joint with sea. The Valaichenai area which is taken by me to research is playing important rolling fishing industry.

Some of fisher men are doing fishing as their full time job for their income, and some of them are doing as part time. But they are suffering by some of the problems such as difficulties in transport, store and difficulties in getting reasonable price level for fishes. In my research, I am dealing with this matter by identifying the problems of fishermen and finding out the solutions of that problems. It is the main objective of this project. The data and other information were collected by me in field visit. Using these data and information I completed my task, releasing this book as my virgin attempt.
