Abstract

The topic of this research is the study of successful of Vidatha Programme in the scientific, technological and industrial development of the Koralaipattu central divisional secretariat area. In this research performance of VRC are discussed through seven chapters based on collected data, statistical analysis, questionnaires, and interview.

Objectives of the studies are identify the level of development or under development of Vidatha Programme ,identify the factors influencing the development or under development and recommended solution to further development of Vidatha programme.

Here qualitative research approach specifically design to evaluate the successful of Vidatha programme in the scientific, technological and industrial development of the Koralaipattu central divisional secretarite area. The data presentation collected information are presented through tables and pie charts and also presented statistical data presentation and analysis.

Finally when considering the entire set of statements, the finding results from 100 families in the area of Koralaipattu central divisional secretariat. Out of 100 respondents 17% of the sample covering is lower success, 59% were moderately performance, and 24% were having high performance. Research can be come to the conclusion the success of Vidatha programme is moderate level.
