ABSTRACT

The research study has intended the title, "Compare study on development of sports between Eastern University and University of Peradeniya." This research was carried out for the reason for Eastern University students participation of each games vise are very low level in the Inter University Games as well as Mini Olympic Games compare to the University of Peradeniya. The objectives of this research study were to identify the participation of the present level in the Eastern University and to recommends students to improve the whole of participation. The research study's conceptualization framework has four variables such as performance management, training, resources & facilities and motivation.

Primary and secondary data were used in this study. Primary data were collected from questionnaires and interviews and secondary data collected form Department of Physical Education, Eastern University magazine, Srilanka University Association (SLUSA) annual report and Inter University results. 100 participants of University of Peradeniya and 100 participants of the Eastern University were selected as a sample and questionnaires were issued to them to collect the data. The collected data were analyzed using the univariate method and used SPSS package. The data collected were presented in the form of tables and bar charts.

The research findings shows, the participation of the sports activity of the eastern University was in low level almost all the variables contributed in determining the research output.

Therefore, the key recommendation for the participants should be given proper exposure such as scholarships to oversee to get training or friendly matches in foreign countries. It will motivate the participants to take part in sports activity

I hope this research will be helpful to increase the number of participant and effectiveness in sports at the Eastern University sports Developments.
