Abstract

In recent years, extensive studies have been undertaken concerning to examine the relationship between firm profitability and other factors such as capital structure, working capital management, and risk. However researches on the relationship between non-current asset utilization and profitability have not been made. This study attempted to give some knowledge about the relationship between non-current assets utilization and profitability in Sri Lankan companies. The major problem behind this study was “what is the relationship between non-current assets utilization and firm profitability”. Listed companies in Colombo Stock Exchange have been studied in four business sectors. Return on capital employed (ROCE) was the measure of profitability and the assets turnover ratio was the measure of utilization of non-current assets in this study. Relevant financial figures for analyzing non-current assets utilization and profitability extracted from the past five (2009 – 2013) year financial reports of the selected 30 companies. Correlation analysis was made to find out the relationship between independent and dependent variables.

A strong positive relationship (0.526) was found between the utilization of non-current assets and profitability of the firm. While considering each sectors all the selected industries (manufacturing - 0.681, motor - 0.586 and hotel & travels – 0.594) other than the service sector, shown a strong positive relationship between the variables while the service sector companies shown a weak positive (0.06) relationship between the variables. As the intangible assets were in an insignificant level, the utilization of total non-current assets and utilization of tangible non-current assets were approximately similar.

Abstract	ii
Table of Content	iii
List of Tables and Figures	vi
01. Chapter One: Introduction	1 - 6
1.1. Background of Study	1
1.2. Problem Statement	3
1.3. Research Question	4
1.4. Objective of the Study	4
1.5. Significance of the study	4
1.6. Scope of the study	5
1.7. Summary	6
02. Chapter Two: Literature Review	7 – 25
2.1. Introduction	7
2.2. Review of Variables	7
2.2.1. Non-current Assets	8
2.2.2. Assets Utilization	15
2.2.3. Profitability	19
2.3. Summary	25
03. Chapter Three: Conceptualization and Operationalization	26 – 29
3.1. Introduction	26
3.2. Conceptualization	26
3.2.1. Utilization of Non-Current Assets	27
3.2.2. Profitability	27
3.3. Operationalization	29
3.4. Summary	29

04. Chapter Four: Methodology	30 – 37
4.1. Introduction	30
4.2. Study Setting, Design and method of survey	30
4.3. Research Sample	31
4.4. Data Collection	33
4.5. Methods of measurements	34
4.6. Method of Data Analysis and Evaluation	36
4.7. Summary	37
05. Chapter Five: Data Presentation and Analysis	38 – 52
5.1. Introduction	38
5.2. Company information	38
5.2.1. Annual turnover (Sales revenue)	38
5.2.2. Total non-current assets	39
5.2.3. Intangible assets	40
5.2.4. Percentage of intangible assets in terms of total non-current assets	40
5.2.5. Return on capital employed	41
5.2.6. Tangible non-current assets turnover	42
5.3. Research information	42
5.3.1. Trend of return on capital employed	43
5.3.2. Trend in degree of total non-current assets turnover	44
5.3.3. Trend in degree of tangible non-current assets turnover	44
5.3.4. Descriptive statistics for research variables	46
5.3.5. Correlation analysis for research variables	46
5.3.6. Comparison of industry wise differences of relationship between NCA utilization and profitability of the firm	48
5.4. Summary	52
06. Chapter Six: Discussion of Findings	53 – 56
6.1. Introduction	53
6.2. Discussion on the variables	53

6.2.1. Firm Profitability (Return on Capital Employed)	53
6.2.2. Utilization of non-current assets	54
6.3. Discussion on descriptive statistics of the variables	54
6.4. Discussion on the relationship between the variables	55
6.5. Differences in the relationship between utilization of non-current assets and firm profitability among the selected industries	56
6.6. Summary	56
07. Chapter Seven: Conclusions and Recommendations	56 - 60
7.1. Introduction	58
7.2. Conclusions	58
7.3. Recommendations	59
7.4. Limitations	60
7.5. Summary	60
