### You are required to :

- Prepare the cash flow statement of Camarown (Pvt)Ltd. for the year ended 31.12.2006 using the direct method
- (ii) List out the operating activities using the indirect method.

## (20 marks)

03. (i) Explain the risk - return trade off of current assets financing.

(05 marks)

- (ii) Briefly explain the factors which determine the working capital requirements of a firm. (05 marks)
- (iii) Spice Company is desirous to purchase a business and has consulted you, and one point on which you are asked to advice them is the average amount of working capital which will be required in the first year's working.

You are given the following estimates and are instructed to add 10% to your computed figure to allow for contingencies.

|         |  | Amount for      |
|---------|--|-----------------|
|         |  | the year (Rs    |
|         | Average amount backed up for stocks  |                 |
|         | Stocks of finished product   | 15,000          |
|         | Stocks of stores, material   | 18,000          |
|         | Average credit given   | (18 mile)       |
|         | Inland sales 6 weeks credit  | 422,000         |
|         | Export sales 1 ½ weeks credit  | 88,000          |
|         | Average time lag in payment of wages and other out goings  | alter a         |
|         | Wages 1 ½ weeks  | 340,000         |
|         | Stocks, material 1 ½ months  | 48,000          |
|         | Rent, royalties 6 months   | 20,000          |
|         | Clerical staff ½ month   | 72,800          |
|         | Manager ½ month  | 8,400           |
|         | Miscellaneous expenses 1 ½ months  | 52,000          |
|         | Payment in advance   | 450.05          |
|         | Sundry expenses (paid quarterly in advance)  | 10,000          |
| Set     | -up your calculations for the average amount of working capital required.                          | (10 marks)      |
| 04. (a) | Explain the financial ratios which are more appropriate to ;                                       | Q               |
|         | (i) Potential investors in a company and   |                 |
|         | (ii) Company's own management  |                 |
|         |  | (05 marks)      |
| (b)     | The following accounting information and financial ratio of Milton (Pvt the year ended 31.03.2007. | ) Ltd relate to |

(i) Accounting information :

| Gross profit            | 15% of sales              |
|-------------------------|---------------------------|
| Net profit              | 8% of sales               |
| Raw materials consumed  | 20% of cost of goods sold |
| Direct wages            | 10% of cost of goods sold |
| Stock of raw materials  | 3 months' usage           |
| Stock of finished goods | 6% of cost of goods sold  |
| Debt collection period  | 60 days                   |

All sales are on credit.

(ii) Ratios :

| Fixed assets to sales                 | 1:3     |  |
|---------------------------------------|---------|--|
| Fixed assets to current assets        | 13 : 11 |  |
| Current ratio                         | 2       |  |
| Long term loan to current liabilities | 2:1.    |  |
| Capital to reserves & surplus         | 1:4     |  |
|                                       |         |  |

If the value of fixed assets as at 31.03,2006 amounted to Rs. 2,600,000, prepare a summarized profit and loss account of the company for the year ended 31.03.2007 and balance sheet as at 31.03.2007.

(15 marks)

05. a. A plastic manufacturer has under consideration the proposal of production of high quality plastic glasses. The necessary equipment to manufacture the glasses would cost Rs. 80,000. The production equipment would last 5 years with no salvage value. The glasses can be sold at Rs. 3 each. Regardless of the level of production, the manufacturer will incure cash cost Rs. 25,000 each year if the project is undertaken. The variable costs is estimated at Rs. 2 per glass. The manufacture estimates it will sell about 75,000 glasses per year; the straight line method of depreciation will be used, the ordinary tax rate is 55%.

Should the proposed equipment be purchased? Assume 10% as the cost of capital.

(15 marks)

b. A machine is available for purchase at a cost of Rs. 80,000, is expected it to have a life of 5 years and a scrap value of Rs. Rs. 10,000 at the end of the 5 year period.

They expect to earn the following profit (before depreciation).

| Year | profit (before depreciation)<br>(Rs) |
|------|--------------------------------------|
| 1    | 20,000                               |
| 2    | 40,000                               |
| 3    | 30,000                               |
| 4    | 15,000                               |
| 5    | 5,000                                |
|      |                                      |

You are required to calculate the Accounting Rate of Return (ARR).
