EASTERN UNIVERSITY, SRI LANKA FIRST YEAR/ FIRST SEMESTER EXAMINATION IN AGRICULTURE- 2006/2007 EXTERNAL DEGREE AEC 1101: INTRODUCTORY MICRO ECONOMICS Answer all questions Time allowed: 2 Hours

Name: -----

Index number: -----

01)

a) What are the characteristics of resources?

b) Define the term Scarcity in economic point of view

c) What is meant PPC (production possibility curve)? What can be concluded about an economy which is

- i) operating on its PPC
- ii) operating inside the PPC

d) Sketch the curve for unitary elastic condition

e) Interpret the following elasticity conditions:

Own price elasticity of rice: -0.86 Cross price elasticity of chicken and beef: 0.345 Income elasticity of rice: 0.153

(25 marks)

02)

a) Rani has a weekly income of Rs 350/= which she allocates between bread and carrot. Suppose bread (b) cost Rs 25 per Kg and carrot (c) cost Rs 50 per Kg.

(i) Draw her budget constraint?

(ii) An import restriction of wheat raises the price of bread to Rs 50 per Kg. What does his budget constraint look like now?

b) The marginal utility schedules for two goods are given in the following table. Assume that the price of X equal price of Y equal Rs 1. How much of X and Y would Raja buy if he had 7/= to spend?

| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
|-----|----|----|----|-----|----|---|---|---|---|
| MUA | 9 | 8 | 7 | . 6 | 5 | 4 | 3 | 2 | 1 |
| MUB | 19 | 17 | 15 | 13 | 11 | 9 | 7 | 5 | 3 |

c) Utility function for a commodity X is given by $U = 11x - x^2$. Find out the quantity of commodity that he will buy at his saturation point

d) Define an indifference curve? Explain its properties related to consumer satisfaction

03)

a) Define production function

b)

i) Graphically show the different types of product curves and stages of production

iii) Define the rational stage of production

c) Using the table given below answer the following:

| Land | 2 | 2 | 2 | 2 | 2 | 12 | 12 | 12 | 12 | 12 |
|------------|----|----|----|-----|-----|-----|-----|-----|-----|----|
| Fertilizer | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 0 | 10 |
| Yield (Kg) | 20 | 50 | 90 | 120 | 140 | 150 | 150 | 140 | 120 | 90 |

i) Calculate the average and marginal product of fertilizer

ii) If the output price is Rs 50 /kg and the fertilizer price is Rs 1000/kg and the rent for a unit land is Rs 1500. Find out the optimal level of fertilizer usage

(25 marks)

(25 marks)

04)

- a) Graphically show the different types of short run cost curves:
- b) The total short run cost function of a firm is given by C = 190 + 53Y where Y is the output, C = total cost Identify firm's fixed cost, average fixed cost, average variable cost, and marginal cost from the above function.

c) Explain how the long run cost curves are related to economies of scale?

d) Fill in the missing values to complete the following table:

| | TFC | TVC | TC | AFC | AVC | AC | MC |
|---|-----|---------------|----|--|------------------------|--|--|
| 0 | | | 30 | | | | |
| 1 | | | | | | | 10 |
| 2 | | | | | | 24 | 10 |
| 3 | | 24 | | | | | 1000 100 100 100 100 100 100 100 100 10 |
| 4 | | | 62 | | | 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1 | |
| 5 | | | | and the second | 10 | | 1. |
| 6 | | 1 1 1 1 1 1 1 | | 1.1.1.1.1.1.1.1.1.1.1.1.1.1.1.1.1.1.1. | A STATE AND A STATE OF | 17 | |
